

## **Laser World of Photonics 2025 Statements Exhibitors**

**– in alphabetical order –**

**Kaja Dauelsberg, Marketing Manager ficonTEC:**

“The LASER trade fair is a highlight for us every time. It brings our industry together and provides a platform for fresh momentum. At ficonTEC, we are showcasing our latest solutions for the automated assembly and testing of photonic components - and having the conversations that make all the difference.”

**Thomas Fehn, Chief Sales Officer at TRUMPF Laser Technology:**

“Laser World of Photonics remains one of the most important trade fairs for laser technology. It is where we meet the relevant target groups for our products. The trade fair is also an important networking venue.”

**Stefan Hallwig, Head of Business Development and Marketing Communications EMEA Thorlabs:**

“For Thorlabs, Laser World of Photonics is the most important photonics trade fair in Europe and a key meeting point for engaging with customers and partners from around the world on new developments and emerging trends. We were able to present ourselves across multiple locations at the trade fair exactly as we envisioned. The number of contacts on the first day exceeded our expectations. From planning and organization to execution, everything has met our complete satisfaction. While it's too early to fully evaluate our success, the initial response has been extremely positive.”

**Dr. Ralf Kuschnerreit, member of the Executive Board of Jenoptik AG and representative of Jenoptik on the advisory board of the Laser World of Photonics trade fair:**

“For us, Laser World of Photonics is not only the ideal platform to share our passion for innovation and a clear vision for the future of photonics with our customers. It also provides a unique opportunity to build and maintain valuable relationships across multiple levels and to enhance the visibility of our brand. We engaged in lively discussions in a positive overall atmosphere, strengthening existing partnerships and initiating new ones. While it may still be too early to measure concrete outcomes, the event is already proving to be a great success.”

**Hans-Jörg Schlemper, Product Manager Precision Optics Satisloh:**

“It has been an extremely successful event for Satisloh so far. Our global team had the opportunity to engage in productive discussions with customers from all regions of the world.”

**Milo Wu, Business Development Manager Pi Imaging Technology**

“We are honored to have received the Innovation Award – thank you Laser World of Photonics for providing such a valuable platform to connect with innovative minds from the photonics and image processing community!”
