International trade fair for logistics, mobility, IT and supply chain management

transport logistic is the international platform where the logistics industry presents itself in all its diversity. It connects companies, markets, and solutions and opens up new perspectives for business collaboration.

As an integral part of transport logistic, air cargo Europe—the world's leading trade fair for air freight—complements the offering as a “show in show” and creates additional added value for exchange, networking, and professional inspiration.

The high international relevance was most recently demonstrated in 2025: Over 77,000 trade visitors from more than 130 countries used the trade fair as a central business and information platform.

With around 150,000 m² of exhibition space, transport logistic is one of the world's leading industry meeting points and continues to evolve.

Exhibition areas.

transport logistic brings together all central solutions of the logistics industry in one place. In four clearly structured exhibition areas, it represents transport by land, sea, and air, as well as intermodal and combined transport concepts. From services and products to innovative research results, the trade fair offers a comprehensive overview of current developments and forward-looking solutions.

Exhibition Areas:

- Services, freight transport, logistics
- IT, telematics, e-business, telecommunications
- Equipment for freight transport
- Intralogistics, warehouse management systems, auto ID, packaging

Conference program.

Global shifts, dynamic markets, and increasing requirements characterize the logistics industry. The transport logistic conference program addresses these developments and provides practical impulses for operational issues as well as for strategic decisions and the further development of business models.

In around 60 events, more than 274 speakers and moderators share their expertise with the professional audience. A total of approximately 7,250 participants used the conference program as a platform for knowledge transfer, discussion, and professional exchange.

Trend in visitor numbers

“For us, transport logistic is more than just a trade fair— it is a central industry meeting point with international appeal. This is where all modes of transport come together to talk about future topics, discuss challenges, and develop solutions together.”

Dr. Frank Albers
Managing Director Sales & Marketing, KRONE Trailer

“transport logistic 2025 was an absolute success for DSV! Our innovative, new exhibition stand attracted a high number of visitors and provided the ideal stage for engaging, constructive discussions with our customers and partners. It was an outstanding experience for us to impress so many people with DSV in just a few days.”

Torge Köhnke
Managing Director, DSV Air & Sea Germany

“The transport logistic trade fair is an indispensable platform for us at the Rhenus Group to connect directly with customers and partners. The conversations were of exceptionally high quality and once again proved why this trade fair rightfully holds its status as the industry’s leading event. Especially in today’s environment, it’s more important than ever to come together and shape the future of our industry.”
