

Information to the special area additive manufacturing

Information to the special area additive manufacturing

Brief description of ceramitec

For experts in the ceramics and powder-metallurgy sectors, ceramitec is the industry's most successful international event and a gathering for leading manufacturers, users and scientists. Visitors include top decision-makers in the brick and tile industry, the sectors for stoneware, refractory ceramics, tiles and sanitary ceramics, the porcelain industry, and the sectors for sintered and technical ceramics and powder metallurgy. The fairs held in the past have confirmed ceramitec's position as the industry's leading international trade fair and premiere platform.

Product index

- Raw materials and additives, production materials and aids
- Storage
- Conveying
- Metering and charging
- Weighing
- Crushing, grinding, milling
- Grading, separation
- Mixing, blending
- Shaping
- Glazing, decorating, surface treatment
- Heat treatment
- Measurement and control
- Analysis and laboratory equipment
- Plant construction, engineering
- Dedusting, filtering
- Handling, packaging, automation
- Tools, spares, replacement parts
- Protection of the environment
- Technical ceramics, components/services
- Research, training, technology transfer
- Trade and specialist literature, associations and organisations

Visitor target groups

Brick making industry, sanitary ceramics, wall and floor tiles, ceramic tableware/crockery, technical ceramics, refractory industry, powder metallurgy, ceramic raw materials/additives, machine building, electrical/electronics industry, skilled trades, wholesale/retail trade, engineering/planning offices, research institutes, colleges/ universities

Basic information

Frequency:
Every 3 years
First held in 1979

Type:
Trade fair

Application deadline:
1st February 2018

Venue:
Messe München,
Entrance EAST

Opening hours:
Opening hours:
Tue. – Thu.: 9 a.m. – 6 p.m.
Fri. 9 a.m. – 4 p.m.

Organizer

Messe München GmbH
Messegelände
81823 München
Germany
Phone: (+ 49 89) 949-11378
Fax: (+ 49 89) 949-11379
E-Mail: info@ceramitec.com
Internet: www.ceramitec.com

Exhibition Management

Igor Palka
(Exhibition Director)
E-Mail: igor.palka@messe-muenchen.de
Phone: (+ 49 89) 949-20411

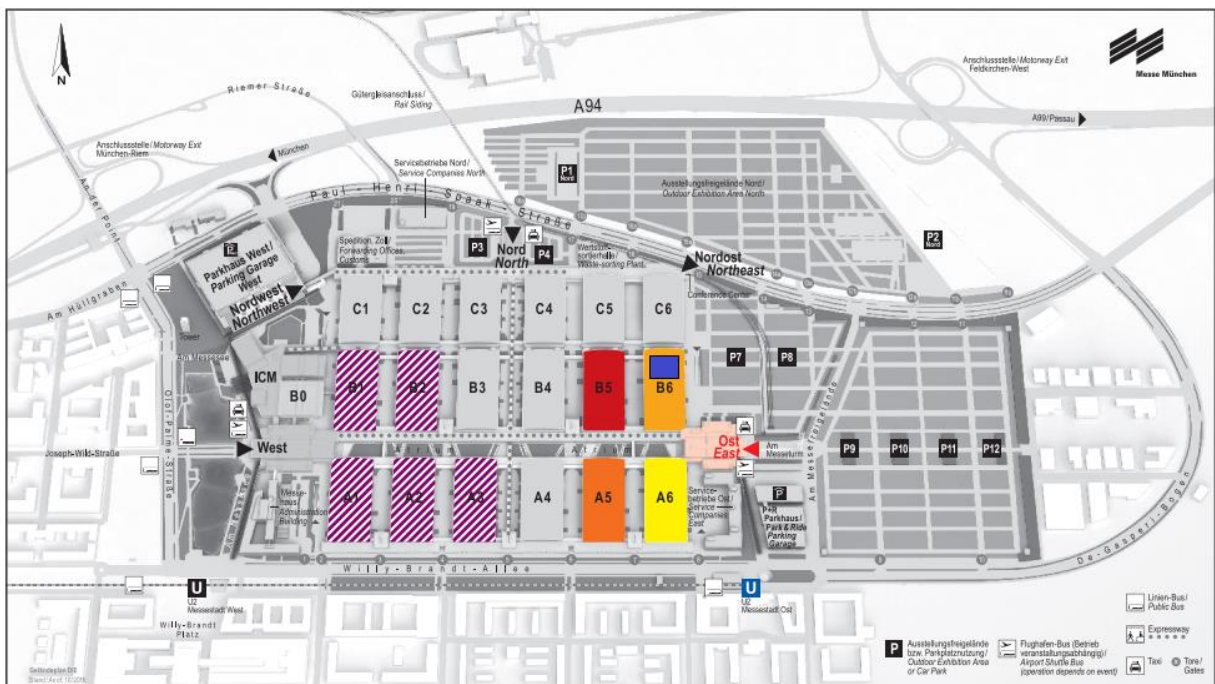

Information to the special area additive manufacturing

It is more than a proven process: The additive manufacturing process for ceramics is a future trend with great market potential. The awareness level of additive manufacturing of metals and ceramics is still rather low. However, the advantages and possibilities provided by this process are tremendous.

With the ceramic and powder metallurgy manufacturing process, the surface quality, component capabilities and mechanical properties can be improved dramatically. As a result, the offered material portfolio is enhanced significantly as well as is the production range of complex components. The additive manufacturing process in the ceramics and powder metallurgy industries is a future-oriented and innovative component of ceramitec as qualitative and resource-saving method.

That is why **ceramitec** as an international hotspot for the ceramics industry is dedicating a separate special show to additive manufacturing. Become part of this unique, top-rate segment and present your innovative exhibits.

Yellow Roh- und Zusatzstoffe, Pulver
Betriebs- und Hilfsmittel
Raw materials and additives,
powders, production materials
and aids

Orange Feuerfeste Werkstoffe, Brennhilfsmittel,
Öfen und Ausrüstungen / Forschung
Refractory materials, firing aids,
kilns and equipment / research

Light Orange Maschinen, Anlagen und Geräte für die
Fein- und Feuertechkeramik, Technische
Keramik und Pulvermetallurgie
Machinery, plants and equipment for
fine and refractory ceramics, technical
ceramics and powder metallurgy

Red Maschinen, Anlagen und Geräte
für die Grobkeramik
Machinery, plants and equipment
for heavy clay ceramics

Blue Sonderrecha Additive
Fertigung
Special exhibition
Additive Manufacturing

Information to the special area additive manufacturing

The participation options at the special area are with an exhibit only or with an accompanying information booth for your company.

Take part and present your exhibit in an inviting open booth concept, including a speakers-corner for presentations and discussions.

The participation at the exhibit area is charged for the whole trade fair duration with 500 €.

A 30-minutes presentation slot in the Forum of the special area is included in the costs.

Facts and Figures

Date: 10.4. - 13.4.2018

Application deadline:

1st February 2018

expected Exhibitors: 600

expected visitors: approx. 17,000

Participation fees:

exhibit area: 500,00 €

information booth: 249,00 € / m²
(including stand construction)

Exhibit area // Services included

- exhibit area
- carpeting
- white stele
- company lettering
- optional equipment
 - 1 bar table with 2 bar chair
 - 1 glass cabinet

Phone: (+ 49 89) 949-20411

further services

- basic entry in the alphabetical list of exhibitors
(catalogue and online exhibitor database)
- additional promotion on the ceramitec homepage and through social media
- 3 exhibitor passes
- 20 guest-tickets free of charge (for invitation of your costumers)

Information to the special area additive manufacturing

The second option is, to participate with an own information booth, next to the special dedicated area. The participation includes a 30-minutes presentation slot in the Forum as well.

An exhibition area of 9 sqm for 249,00 EUR per sqm including the complete stand construction can be reserved until 1st February 2018 with the following application document:
