Ceramitec

Technologies · Innovations · Materials

March 24–26, 2026 · Messe München

What is ceramitec?

- ceramitec is the leading trade fair of the international ceramics industry
- From producers and users to scientists —here, the leading exhibitors from around the world present their products: machinery, devices, systems, processes, and raw materials
- The show is representing the whole value chain from raw materials, refractories, machines for the production of fine ceramics, refractory ceramics and heavy clay to technical ceramics, composites and advanced materials as well as the whole range of process technologies

Focus on technical ceramics

Technical ceramics is a rapidly growing sector of the ceramics industry. This is also reflected in the development of ceramitec. More and more exhibitors are being represented at the trade fair in Munich. The top players in high-performance ceramics from all over the world will be there. Find out now what opportunities ceramitec offers as a meeting place for leading manufacturers, users and scientists.

The Technical Ceramics exhibition area at ceramitec will offer solutions and products for the following user industries:

- Medical technology
- Electronics / Electrical engineering
- Mechanical and plant engineering
- Household appliances
- Jewellery and horlogerie
- Energy and environmental technology
- Automotive
- Aerospace

ceramitec from the exhibitors' point of view:

"ceramitec has been the most important trade fair for us since INMATEC began 25 years ago – there is simply no alternative. The idea for INMATEC originated here in 1997 and we have generated new ideas for advancing our products at every ceramitec since. This is due to the high caliber of visitors. And this is why we are also celebrating our 25th anniversary here together with our customers, suppliers and cooperation partners – because ceramitec always brings everyone together. For us, ceramitec is an industry highlight, one that will at last be held every two years instead of the previous three-year interval."

Dr. Moritz von Witzleben
Managing Director, Inmatec Technologies

"Taking part in ceramitec is important for our company as a leading provider of 3D printing processes for ceramics. As Europe's leading trade fair in this sector, ceramitec offers a platform to showcase our innovative solutions and connect with industry leaders. Participating in ceramitec is of historic importance for our company. It remains an indispensable event for us, and we have already committed to participating in the 2026 edition."

Richard Gaignon
CEO, 3D Ceram
