MESSE MÜNCHEN

Guidelines for Abstract Structure

1. **Introduction (60 words)**
   Give us a brief introduction to your topic: Why is it relevant? What specific problem or research question do you address in your thesis?

2. **Objectives and Research Questions (60 words)**
   What exactly did you want to achieve with your work? Please show us the specific questions your thesis answers.

3. **Material & Methods (60 words)**
   How did you proceed? Briefly explain the methodology and materials you used to achieve your results.

4. **Practical Relevance (100 words)**
   Bridge the gap to the real world: What is the concrete practical application of your work, and how can your results be of benefit in the future?

5. **Results (100 words)**
   To the point: What are the most important findings of your research? Feel free to also address the opportunities and risks arising from them.

6. **Conclusion & Outlook (75 words)**
   Looking ahead: How can your results be applied and what next steps are needed? Tell us what makes your approach or your results stand out – or perhaps what was most surprising about them.
