bauma, the world's leading trade fair for construction machinery, building material machines, mining machines, construction vehicles and construction equipment, will take place at the Munich exhibition center from April 7 to 13. The trade fair will be opened **on April 7 at 9.30 a.m.** by **Klara Geywitz, German Minister for Housing, Urban Development and Building, Bavaria's Minister President Dr. Markus Söder** and **Munich's Mayor Dieter Reiter** together with the **CEO of Messe München, Stefan Rummel** in the Restaurant Turmblick (East Entrance, 1st floor). Media representatives will have the opportunity to ask questions and take photos and videos. The official tour of the trade fair will then begin.

“bauma is more than just a world-leading trade fair. It is the heartbeat of the industry. The impetus provided by bauma and its exhibitors has a decisive influence on the markets. We are delighted this year to welcome over 3,500 exhibitors from 57 countries to the exhibition center in Riem. The focus is on future guidelines for the industry: digitalization and sustainability,” says CEO Stefan Rummel.

They are reflected in the five key topics, which will be brought to life in the supporting program and through exhibitors' innovations: climate neutrality, alternative drive concepts, networked construction, sustainable construction, and the mining challenge. After all, the construction sector is currently still responsible worldwide for around 38% of carbon emissions, of which around 10% are attributable to construction processes and the production of building materials. carbon footprint can be significantly reduced by integrating innovative, climate-neutral technologies such as electric wheel loaders and autonomous excavators, and using sustainable building materials. bauma is a crucial platform for presenting innovative, climate-friendly technologies that help decarbonize the industry and support the EU target of climate neutrality by 2050.

Interesting and strange facts

The number of innovations being presented for the first time at bauma shows just how much movement there is in the industry and how committed manufacturers are to – often also ecological – further development. Wirtgen, for example, is presenting no fewer than **45 world premieres** this year. Doka is bringing along a total of **30 new products** and its **30-meter-high scaffold tower** is a real eye-catcher. **180 steps** have to be climbed to enjoy the view from the very top. The tower comprises **12,340 components** and weighs **67 tons** in total. The tower is also easy to see thanks to the **113 square meter Sitelight LEDs**. Equally impressive is the **CC 78.1250-1 lattice boom crawler crane** from Tadano Faun, which weighs in at an impressive total of **996 tons** – roughly equivalent to the weight of **100 African bull elephants**. But the topic of climate friendliness is also very much in focus. Volvo Construction, for example, will be represented at this year's bauma for the first time with a wide range of **purely electrical, emission-free** machines.

bauma in figures

The world's leading trade fair for construction machinery, building material and mining machines as well as construction vehicles and equipment will be held at the Munich exhibition center from **April 7 to 13**. **More than 3,500 exhibitors from 57 countries** will be presenting their exhibits, innovations and trends in the halls and the outdoor area **over 614,000 square meters – the equivalent of around 86 soccer pitches**.

More information about bauma can be found at: <https://bauma.de/en/>

bauma

bauma is the world's leading sector event for construction machinery, building material machines, mining machines, construction vehicles and construction machinery. With a total exhibition area of 614,000 square meters, it is the largest trade fair in the world. bauma takes place every three years. The next event will be held in Munich from April 7 to 13, 2025.

bauma NETWORK

In addition to holding the world-leading bauma trade fair, Messe München has a wealth of experience when it comes to organizing other international construction machinery trade fairs. For example, Messe München also organizes bauma CHINA in Shanghai, and partners with the Association of Equipment Manufacturers (AEM) to organize bauma CONEXPO INDIA in Greater Noida/Delhi. In March 2017, the M&T EXPO was added to the bauma NETWORK in the form of a license agreement with SOBRATEMA (Brazilian Association of Technology for Construction and Mining).

Messe München

As one of the world's leading trade fair organizers, Messe München presents the world of tomorrow at its around 90 international trade fairs. These include twelve of the world's leading trade fairs such as bauma, BAU, IFAT, and electronica. Its portfolio comprises trade fairs for capital and consumer goods, as well as for new technologies. Together with its 1,300 employees in the group and the affiliated companies, it organizes trade fairs in China, India, Brazil, South Africa, Turkey, Singapore, Vietnam, Hong Kong, Thailand, and the U.S. With an international network of affiliated companies and foreign representatives, Messe München is active worldwide. The more than 150 events held annually attract around 50,000 exhibitors and around three million visitors in Germany and abroad. This makes Messe München an important economic driver, triggering purchasing power effects in the billions.
