

LOPEC 2026

Design@LOPEC – Sponsoring Items

Designing with flexible hybrid electronics & e-textiles

International Exhibition and
Conference for Flexible, Organic
and Printed Electronics

Exhibition: February 25–26, 2026
Conference: February 24–26, 2026
ICM – International Congress Center Messe München, Germany

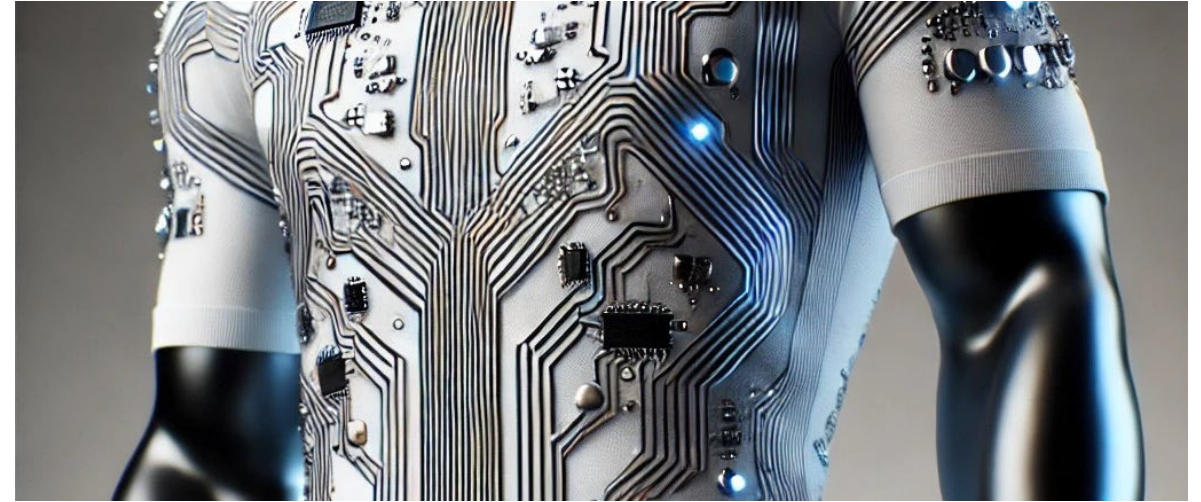

Design@LOPEC – Sponsoring Items

Function, form and technology are critical to every design. The technology of **printed electronics opens new dimensions in product design**. LOPEC makes these new dimensions tangible.

By inviting product and fashion designers, LOPEC aims to **explore new applications** of printed electronics in wearable technology, smart fabrics and innovative product design.

The event will feature hands-on experience and **networking and collaboration opportunities**, allowing sponsors and participants to stay ahead of trends.

Sponsoring the Design@LOPEC workshop provides your company with direct access to leading designers. You will **generate ideas** for your products, **explore new applications**, and receive feedback from design experts.

Design@LOPEC – Overview Sponsoring Items

Gold Package (exclusive)

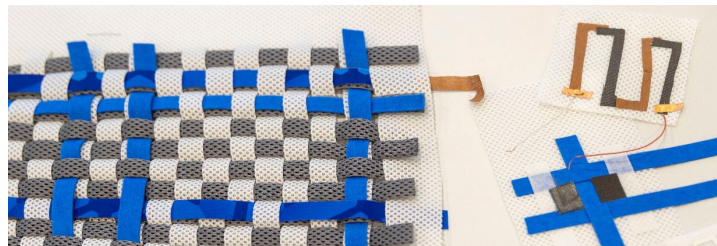

- Top level branding: Logo on all major Design@LOPEC promotional materials, including relevant event website, flyers, newsletters
