

The Quantum Revolution

MESSE
MÜNCHEN

The world's largest trade fair
for quantum technology

**World of
Quantum**

June 22—25, 2027
Messe München

The meeting place for the Quantum Community

Discover all the important trends at the Munich trade fair, innovations and visions for the next technological revolution — quantum technology.

The fourth edition of the **World of Quantum** will again take place parallel to Laser World of Photonics, World of Photonics Congress and automatica.

Facts and figures 2025

Visitors

160

Exhibiting
companies

70+

Presentations

Visitors particularly appreciated

- The presence of the market leaders
- Internationality of the exhibitors
- Atmosphere at the trade fair
- Opportunities for networking
- Leading trade fair character
- Application orientation of the trade fair content

Number of visitors per application area

- 8.200 Laser systems for quantum technology
- 6.300 Quantum computing
- 5.300 Quantum communication
- 5.100 Quantum sensing & quantum metrology
- 4.300 Quantum imaging
- 3.600 Quantum cryptography
- 3.400 Quantum simulation
- 2.900 Subsystems and components for quantum technology

The unique exhibition concept of World of Quantum is based on three pillars and thus perfectly meets the needs of the quantum community:

3 pillars for the quantum community

Exhibition area

Presenting
innovative concepts

Information area

Inform about current
projects

Networking area

Find partners and
investors

The combination of companies, start-ups, forums, poster sessions and networking, combined with the Laser World of Photonics, is the ideal platform for presenting innovative products and research results and discussing the fields of application with potential customers.
