

Kurt Sievers

President and Chief Executive Officer NXP Semiconductors N.V.

Kurt Sievers has been President and Chief Executive Officer of NXP Semiconductors since May 2020.

Kurt Sievers has been a member of NXP's executive management team since 2009 and was instrumental in defining and implementing NXP's strategy for "secure connectivity for a smarter world." Prior to being elected CEO, he served as President of NXP, overseeing all of the company's business units. In 2019, Kurt led the successful acquisition of Marvell's Wi-Fi Connectivity Business Unit. This enabled NXP to provide scalable processing and connectivity solutions to customers in NXP's key end markets. In 2015, he played a key role in the merger of NXP and Freescale Semiconductor. It created one of the world's leading semiconductor companies, primarily pioneering the automotive industry and secure edge processing.

Kurt Sievers joined NXP in 1995 and progressed through a series of leadership positions in sales and marketing, product definition and development, strategy and general management in a variety of market segments.

Education

Kurt Sievers holds a Master of Science in Physics and Information Technology from the University of Augsburg.
