THE FIRE PROTECTION SLIDING DOOR FOR THE TOUGHEST REQUIREMENTS

The standard has been redefined! Safe, versatile and aesthetic – our **Orpheus** fire protection sliding door has been optimised and offers you maximum design flexibility, as well as superlative safety standards that convince in a wide variety of construction situations. The door unites innovative technology with elegant design, creating a harmonious combination of aesthetics and functionality.

Its clean lines and modern elegance make **Orpheus** perfect for exacting architectural projects. Thanks to the wide variety of possible combinations and options, you can choose from 1- or 2-leaf and 1- or 2-part designs that include integrated wicket doors and glazing. Invisible mounting by means of a concealed hooking system ensures a pristine appearance with no visible screws.

In addition to the aesthetic flexibility it offers, the fire-rated sliding door stands out above all for safety, which has been tested in accordance with European fire safety standards. Invisible fire protection is ensured by ceiling and side flaps. A cost-effective electric drive enables the door to be opened and closed by motor in normal operation, while the high degree of pre-assembly saves time and costs when it comes to installation.

Take advantage of our comprehensive advice and all-round service – from planning to installation. In **Orpheus** you have the optimum solution for modern building projects, guaranteeing your property's longevity and appreciation.
