
SAFETY ROOF HOOKS LADDER PROTECTION SAFETY NET HOLDERS

OUR SERVICES

YOU'RE SAFE UP HERE WITH US.

Since our company was founded in 1994, we have dedicated ourselves to the design of fall protection devices. We are a family-run company with an open ear for the concerns and needs of our customers, and think of ourselves as holistic problem solvers; as a reliable partner, who sees eye-to-eye with you, is happy to help with individual solutions for your project and offers professional solutions. Every day we work hard to become even better and we place great importance in

- individual support
 - expertise
 - the power of innovation
 - reliability
 - quality
- ... and last but not least also **availability for shipping.**

LUX-top® SDH safety roof hooks are used to suspend roofers' ladders and for attaching roofing trestles as well as attaching personal fall protection equipment (PFPE) when working on pitched roofs and high-pitched roofs. They are suitable for roofs with tile or pantile, slate, plain tile, double standing seam, trapezoidal profile or sandwich profile covering. LUX-top® Ladder protection devices allow access to flat and steep roofs safely via a clearly defined access point and prevent leaning ladders from tilting or sliding sideways or outwards. In combination with nets according to EN 1263-1, the LUX-top® BEN safety net holder provides effective protection against falling into the inside of the building or through ceiling openings of any size.

PRODUCTION / SUPPLY

- ▶ Experience – for over 25 years
- ▶ Product development and production in-house
- ▶ Quality assurance through in-house test equipment
- ▶ Innovation
- ▶ Made in the greater region Trier-Luxembourg
- ▶ Just in time delivery, across Europe
- ▶ Product availability thanks to high stock levels
- ▶ Fast & flexible
- ▶ Special designs/solutions
- ▶ Individual solutions possible
- ▶ Monitored and tested by DEKRA Testing and Certification GmbH
- ▶ In-house production control according to EN 1090-2

MATERIAL

- ▶ Stainless steel 1.4301
- ▶ Corrosion resistant
- ▶ Low heat conductivity
- ▶ Weather and UV-resistant
- ▶ Robust
- ▶ High-quality surfaces with rounded edges
- ▶ Durable
- ▶ Sustainably recyclable

PLANNING / SERVICE

- ▶ We plan for you
- ▶ Planning according to DGUV information 201-056
- ▶ Planning as a basis sketch for the documentation of assembly & installation
- ▶ Based on current standards and regulations
- ▶ Determination of quantities and requirements
- ▶ LUX-top® QUICK-DOKU (simple and clear documentation via app)
- ▶ Design of customised individual solutions

TEXTS FOR TENDER (in German only)

- ▶ All products and service descriptions available to download as a text for tender
- ▶ Available at **Heinze** or **ausschreiben.de**, or on our **webpage**
- ▶ Available in 9 export formats: GAEB XML, GAEB 90, PDF, DOCX, RTF, TXT, XLSX, DATANORM 5, ÖNORM

MEMBERSHIP AND CERTIFICATION

PRODUCTS / VARIANTS

SAFETY ROOF HOOKS

For suspending roofers' ladders and for attaching roofing trestles as well as for attaching personal fall protection equipment (PFPE).
Type examination tested according to EN 517:2006 Type B by DEKRA Testing and Certification GmbH.

LUX-top® SDH-Z II

Safety roof hooks for pitched roofs and high-pitched roofs with tile or pantile covering

- ▶ Minimum rafter dimensions: 60 x 140 mm
- ▶ Attachment material: 3 wood construction screws \varnothing 8 mm

LUX-top® SDH-B

Safety roof hooks for pitched roofs and high-pitched roofs with plain tile covering

- ▶ Minimum rafter dimensions: 60 x 140 mm
- ▶ Attachment material: 3 wood construction screws \varnothing 8 mm

LUX-top® SDH-S

Safety roof hooks for pitched roofs and high-pitched roofs with slate covering

- ▶ Minimum rafter dimensions: 60 x 140 mm
- ▶ Attachment material: 3 wood construction screws \varnothing 8 mm

LUX-top® SDH-FALZ

Safety roof hooks for pitched roofs and high-pitched roofs with double standing seam covering

- ▶ Minimum sheet metal thickness: Stainless steel: 0.5 mm, copper: 0.6 mm, galvanized sheet steel: 0.6 mm, zinc: 0.7 mm
- ▶ Attachment material: Aluminium seam clamping rail with 4 attachment screws

LUX-top® SDH-RVT

Safety roof hooks for pitched roofs and high-pitched roofs with trapezoidal profile or sandwich profile covering

- ▶ Minimum sheet metal thickness: Steel: 0.5 mm, aluminium: 0.7 mm
- ▶ Attachment material: 8 sealing rivets and 4 sealing strips + 3 flat-head screws \varnothing 8 mm

LADDER PROTECTION DEVICES

For fixing a leaning ladder against tilting/sliding sideways and outwards.

LUX-top® LS I

Ladder protection for flat roofs for attaching to the attic cover

- ▶ Dimensions: 450 x 80 x 3 mm
- ▶ Attachment material: 4 sealing rivets and 1 sealing strip

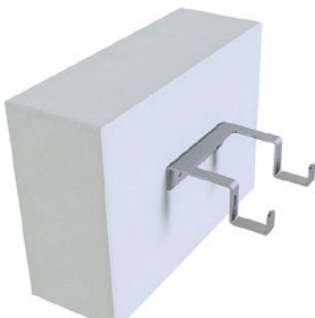

LUX-top® LS II

Ladder protection for steep roofs for attaching to the rafters or the eaves board, as well as on trapezoidal profiles or sandwich elements

Already secured against tilting/sliding sideways and outwards before first stepping onto the leaning ladder

- ▶ Dimensions: 520 x 260 x 6 mm
- ▶ Attachment material: 3 wood construction screws \varnothing 8 mm or 8 sealing rivets and 4 sealing strips + 3 flat-head screws \varnothing 8 mm (not included in delivery)

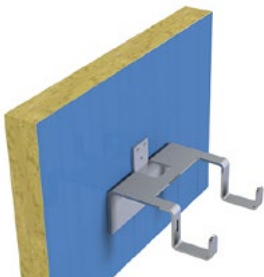

LUX-top® LS III

Ladder protection for flat roofs for attaching to the façade (timber or concrete construction)

Already secured against tilting/sliding sideways and outwards before first stepping onto the leaning ladder

- ▶ Dimensions: 260 x 256 x 6 mm
- ▶ Attachment material: 2 anchor bolts M12 A4 or 4 wood construction screws \varnothing 8 mm (not included in delivery)

LUX-top® LS IV

The ladder protection for flat roofs for attaching to the sandwich or trapezoidal profile façade

Already secured against tilting/sliding sideways and outwards before first stepping onto the leaning ladder

- ▶ Dimensions: 260 x 256 x 6 mm
- ▶ Attachment material: 6 sealing rivets and 3 sealing strips

SAFETY NET HOLDERS

For assembling safety nets with suspension ropes, carabiners or shackles.

LUX-top® BEN SAFETY NET HOLDER

Safety net holder for nets according to EN 1263-1
Test load: 6.0 kN in all directions

- ▶ Dimensions: 105 x 38 x 2 mm
- ▶ Attachment material (wood): 2 wood construction screws \varnothing 8 mm

Packing unit = 50 pieces

DISTRIBUTION

ADVANTAGES

ROOF SAFETY HOOKS

- ✓ Easy and quick installation
- ✓ High-quality processing
- ✓ Practical minimum requirements for the fixing substrates
- ✓ Fits perfectly into the roof covering
- ✓ Colour coated, unobtrusively blends in with the roof covering

LADDER PROTECTION DEVICES

- ✓ Easy and quick installation
- ✓ High-quality processing
- ✓ Immediate safety after setting up the ladder
- ✓ No sideways and outwards tilting/sliding of the ladder
- ✓ Can be easily retrofitted
- ✓ Clearly defined access to the roof

QUICK-DOKU

Simple and clear documentation of installed LUX-top® anchor devices – **with our QUICK-DOKU app**

- ▶ quick and easy
- ▶ optimised for desktop, smartphone and tablet
- ▶ PDF version of the complete documentation
- ▶ available in 7 languages
- ▶ over 10.000 documents created
