bxPRO

bxPRO FACE

	APPLICATION	FUNCTIONALITY	MAIN MARKET
Alloy: 5005 AQ Thickness: 1-3 mm Width: 1000-2000 mm Anodic layer: 8-25 µm	solid facades cassettes curtain wall	stud welding routing laser cut bending 90° (T2) excellent corrosion resistance	landmark building design educational building museum - hospitality offices and headquarters residential - resort

bxPRO PROFIL

	APPLICATION	FUNCTIONALITY	MAIN MARKET
Alloy: 3005 AQ Thickness: 0.70-1.50 mm Width: 1000-2000 mm Anodic layer: 3-15 µm	deep drawing roll forming	up to 180° bends (T0-T1) excellent corrosion resistance	industrial building roofing noise reduction walls

bxPRO BOND

	APPLICATION	FUNCTIONALITY	MAIN MARKET
Alloy: 5005/1085 AQ Thickness: 0.30 mm (indoor) 0.50 mm (outdoor) Width: 1000-2000 mm Anodic layer: 5 µm (indoor) 8 µm (outdoor)	skin for ACP (Almecco can assist you connecting with ACP producer)	up to 90° bending excellent adhesion excellent corrosion resistance	landmark building design educational building museum - hospitality offices and headquarters residential - resort corporate branding

bxPRO TEK

	APPLICATION	FUNCTIONALITY	MAIN MARKET
Alloy: any anodizable alloy Thickness: 0.30-3.00 mm Width: 1000-2000mm Anodic layer: 3-10 µm	functional technical	electric insulator heat resistant heat conductor	distribution automotive appliances heat sink

COLOURS

organic colours - endless possibility
 electro colours (metal salt based)
 full range of bronze
 copper, zinc and gold

TEXTURES

brite - brush - matt - satin
 other textures available on request

MAIN ADVANTAGES

Large format

Lightweight

Easy handling

Easy maintenance

Corrosion resistance

Fire resistance

UV resistance

Sustainability
100% recyclable

Building
beautification

WARRANTY

up to 25 years - this warranty does not apply to any deterioration caused by the action of acidic, alkaline, aggressive liquids, vapours or as a result of accidental damage, misuse, handling and cleaning operations not following the **bxPRO** maintenance procedures

100% recyclable 

CERTIFICATIONS
