International leading trade fair for ceramics

ceramitec is the undisputed meeting point of the international ceramics industry since 1979. Here you will meet market leaders, business partners, decision-makers, and new customers from all over the world. Furthermore, at ceramitec, you will find the complete portfolio and the latest industry innovations.

In these volatile times, ceramitec offers market orientation and serves as a trend barometer. In the light of the many challenges currently facing the ceramics industry, ceramitec exhibitors will present the solutions that are urgently needed. Whether decarbonization, digitalization, energy efficiency or green technologies—ceramitec offers the right answers to all current developments.

Reasons to exhibit

Market leaders

The **key players in the industry** are always fully represented at ceramitec. They are aware of the value of presenting here—and of making contact with decision-makers.

Innovations

ceramitec is a skills and technology center and an innovation forum, all in one. This is why ceramitec is always the trade fair for product launches, where all the new innovations are presented.

Full market overview

The whole of the value chain for the ceramics industry is on display at ceramitec. All of the sectors and industries are represented here.

Preparation for investments

At ceramitec there are innovative products and applications for industry, research and science—ready for the market and waiting to be discovered.

Knowledge boost

Top-class conference programme with international experts and guided tours on various topics.

“This year’s highlights were the many collaborative and high-caliber talks with our customers. For us, ceramitec represents both tradition and change.”

Christian Müller, Deputy Managing Director at Dorst Technologies

“We had the opportunity to meet potential new customers and refresh our relationships with existing customers. We realized that ceramitec now takes place every two years and we are looking forward to coming back to Munich in 2026.”

Paolo Pedrielli, President and CEO of Tecnofilere

“For us, ceramitec is the trade fair in Europe where the refractory and ceramics industry comes together. As always, the quality of discussions with the expert audience is outstanding.”

Johannes Heckmann, CEO of Nabaltec AG

Exhibition sectors:

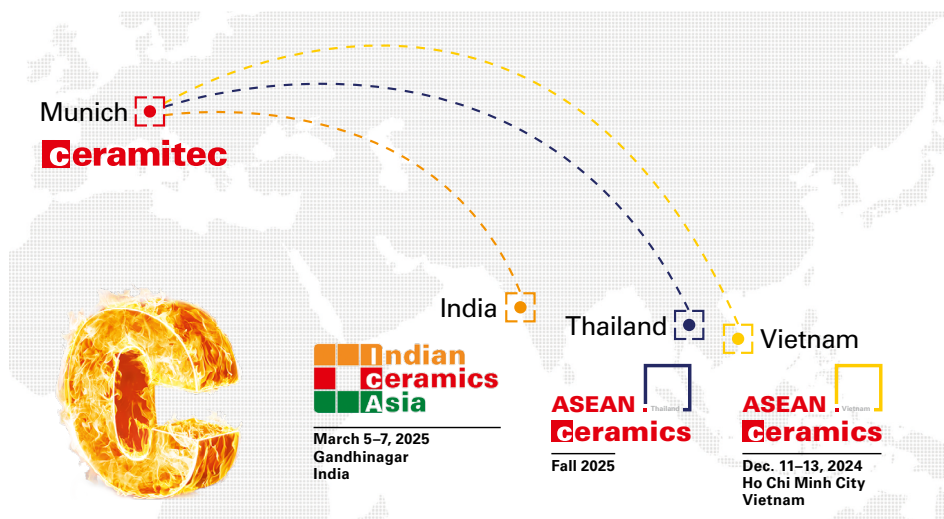

- Additive manufacturing
- Heavy clay
- Technical ceramics
- Raw materials and additives
- Refractory materials
- Fine and refractory ceramics
- Powder metallurgy
- Advanced materials
- Composites

Solutions for:

- Decarbonisation
- Hydrogen Technology
- Digitalisation
- Energy Efficiency
- Energy Storage
- Green Technology and Circular Economy

Industrial Applications:

- Brick industry
- Wall and floor tiles
- Tableware and utility ceramics
- Sanitary ware
- Composites
- Powder metallurgy
- Refractories
- Automotive and electro mobility
- Medicine
- Pharmaceuticals
- Chemistry
- Electrical engineering and sensor technology
- Aerospace
- Energy and environmental technology
- Mechanical engineering
- Information and communication technology
- Process technology
- Glass
- Defense technology
- Optics

**Registration closes:
March 10, 2025**
