N SAVIO
GROUP

FROM 1889 TOWARDS THE FUTURE

Founded in 1889 by Luigi Savio, Savio Group is an Italian company and a global leader in the design, development, and production of accessories for aluminum and multi-material doors and windows.

Quality is our goal

SAVIO
GROUP

QUALITY

Each product is **tested and certified according to the strictest European regulations**. All products are **QM certified by IFT Rosenheim**.

INNOVATION AND RESEARCH

With **numerous registered patents**, our products are the result of **annual investment in Research & Development**.

SAFETY

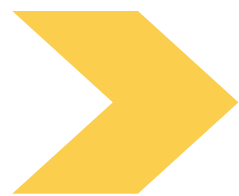

All our products **ensure maximum safety** for reliable solutions that comply with the highest standards.

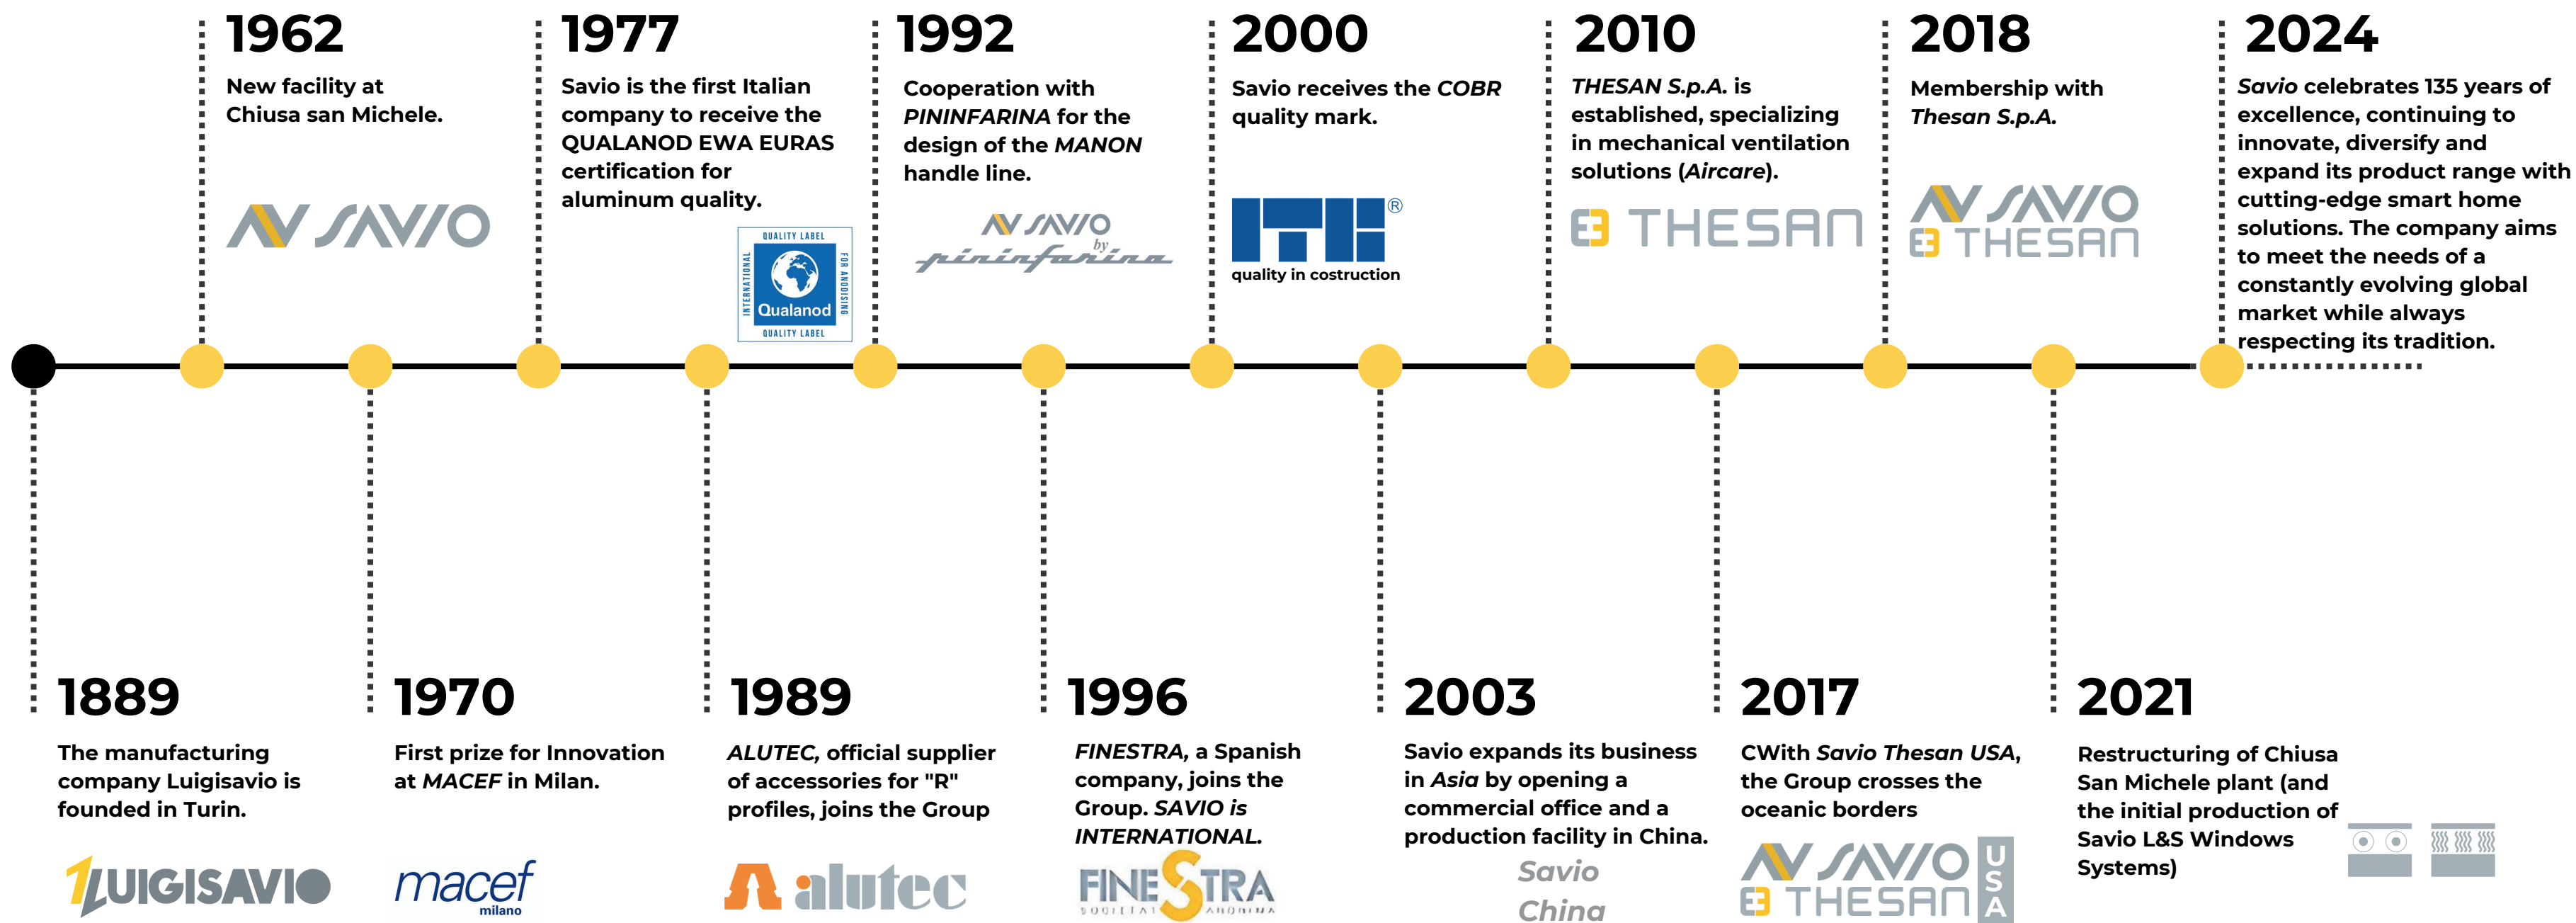

SUSTAINABILITY

We promote a sustainable future by **using renewable energy** and **eliminating the use of plastic**.

THE HISTORY OF THE GROUP

Vision and Mission

VISION

Savio Group aims to be a **global leader** in the **design** and **production of innovative solutions**, contributing to a **sustainable and technologically advanced future** that meets the ever-evolving needs of international markets.

MISSION

Savio Group **offers high-quality products**, ensuring **innovation, diversification, and sustainability**. The company believes in the **value of every employee**, promoting an **inclusive and collaborative environment** where every opinion matters.

Savio worldwide

Savio Group has a **global presence** with a **consolidated network of commercial and production sites**, ensuring strategic proximity to international markets and offering tailored solutions to meet the needs of each customer.

Panic Bars

Tested and certified by AFNOR CERTIFICATION, they are available in the **Juvarra** (also in grained finish), **Brunelleschi, Cellini, and Circeo** models. **Savio Group's panic bars are tested more rigorously than current European regulations, achieving up to 500,000 opening cycles,** well beyond the maximum level specified by standard EN 1125:2008, offering an ideal solution for public and commercial spaces.

Juvarra

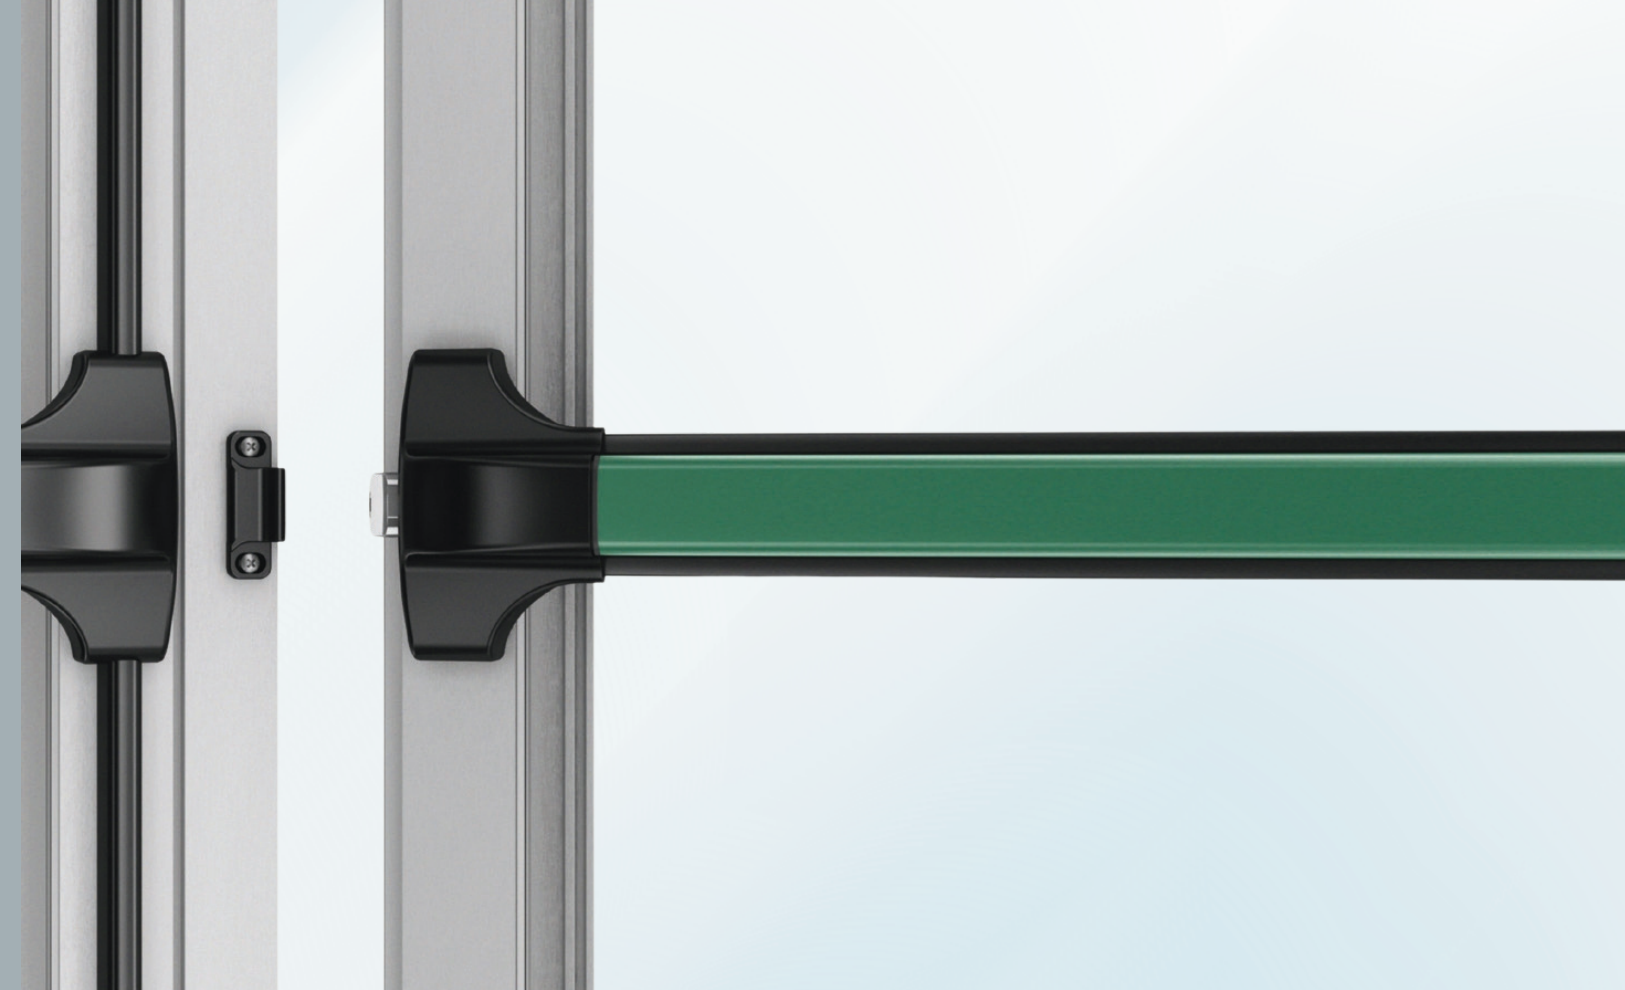

Tested for up to 2,000,000 cycles on 300 kg doors according to standard EN 1125:2008, it is designed to ensure strength and safety. Its flat sliding latch completely eliminates jamming in double doors, **providing a smooth opening and reduced maneuvering effort.** The new **Grinz finish** adds a **modern touch**, reinforcing Savio's commitment to constant innovation.

Brunelleschi

Designed for **optimal grip during closure**, Brunelleschi features a compact design that allows for use on sliding doors as well. **Its innovative geometry enables cylinder replacement** without dismantling the panic bar, making the operation straightforward even for the end user.

Cellini

With **the design by Pininfarina**, Savio's Cellini panic bar complements the range alongside Bernini, **ensuring maximum modularity and adaptability**. **Compliant with UNI EN 1125 standards and featuring CE marking at the highest levels**, it offers horizontal or vertical application solutions with **1, 2, or 3 locking points** for wooden, iron, aluminum, or PVC doors. It shares accessories and refined finishes with the lever model and stands out for its extreme ease of installation, making it versatile and reliable.

Reklò

Designed **for internal and external aluminum doors and emergency exits**, Reklò combines the functions of a hinge and door closer in a single product. **With an opening of up to 180°**, integrated damper, and adjustable latching and closing speed, it delivers performance **certified according to standards EN 1154 and EN 1935**. Tested for doors weighing up to 120 kg, it installs without the need for wall alterations.

RollUp

IN 2021, SAVIO GROUP REVOLUTIONIZED THE CONCEPT OF SLIDING DOORS.

RollUp, Savio Group's hanging trolley system, features **innovative threshold-free technology** and **adjustable trolleys within the frame**, ensuring smooth opening, increased brightness (+20%), and **a load capacity of up to 400 kg**. The panels can be operated manually or automatically, **eliminating architectural barriers** and offering a clean, modern design.

MagLev

Savio Group's patented magnetic levitation system can support up to 1000 kg per panel and boasts a **guaranteed lifespan of 400 years**. The threshold-free sliding panels provide **increased brightness (+20%)** and **frictionless movement thanks to magnetic levitation**. With frame sizes of up to 8 meters, MagLev redefines the limits of sliding architecture.

Thesan AirCare

In the department, we handle the assembly, testing, and packaging of our **Mechanical Ventilation Systems (CMV)**. Recognized internationally for their quality, our innovative products ensure pure air and superior energy efficiency, thanks to continuous investments in Research and Development. With a state-of-the-art R&D department, **Savio Group remains a leader in Mechanical Ventilation Systems (CMV)**. Thesan's innovative solutions have led to the installation of over 40,000 Aircare units worldwide.

Diamond door handles

Innovation and elegance in the name of prestige.

Design, materials, and vision: these are the elements from which they are born.

The Diamond Handles are **24-carat gold plated**, with **natural diamonds** certified by a gemologist, proudly designed and made in Italy.

Savio celebrates 135 years

The new Savio window's handles, launched to celebrate the 135th anniversary, **perfectly combine modern design and functionality.** With an elegant and contemporary aesthetic, these handles **fit seamlessly into both domestic and professional environments.** They are designed to enhance any setting with style and practicality while maintaining the high quality that defines Savio.

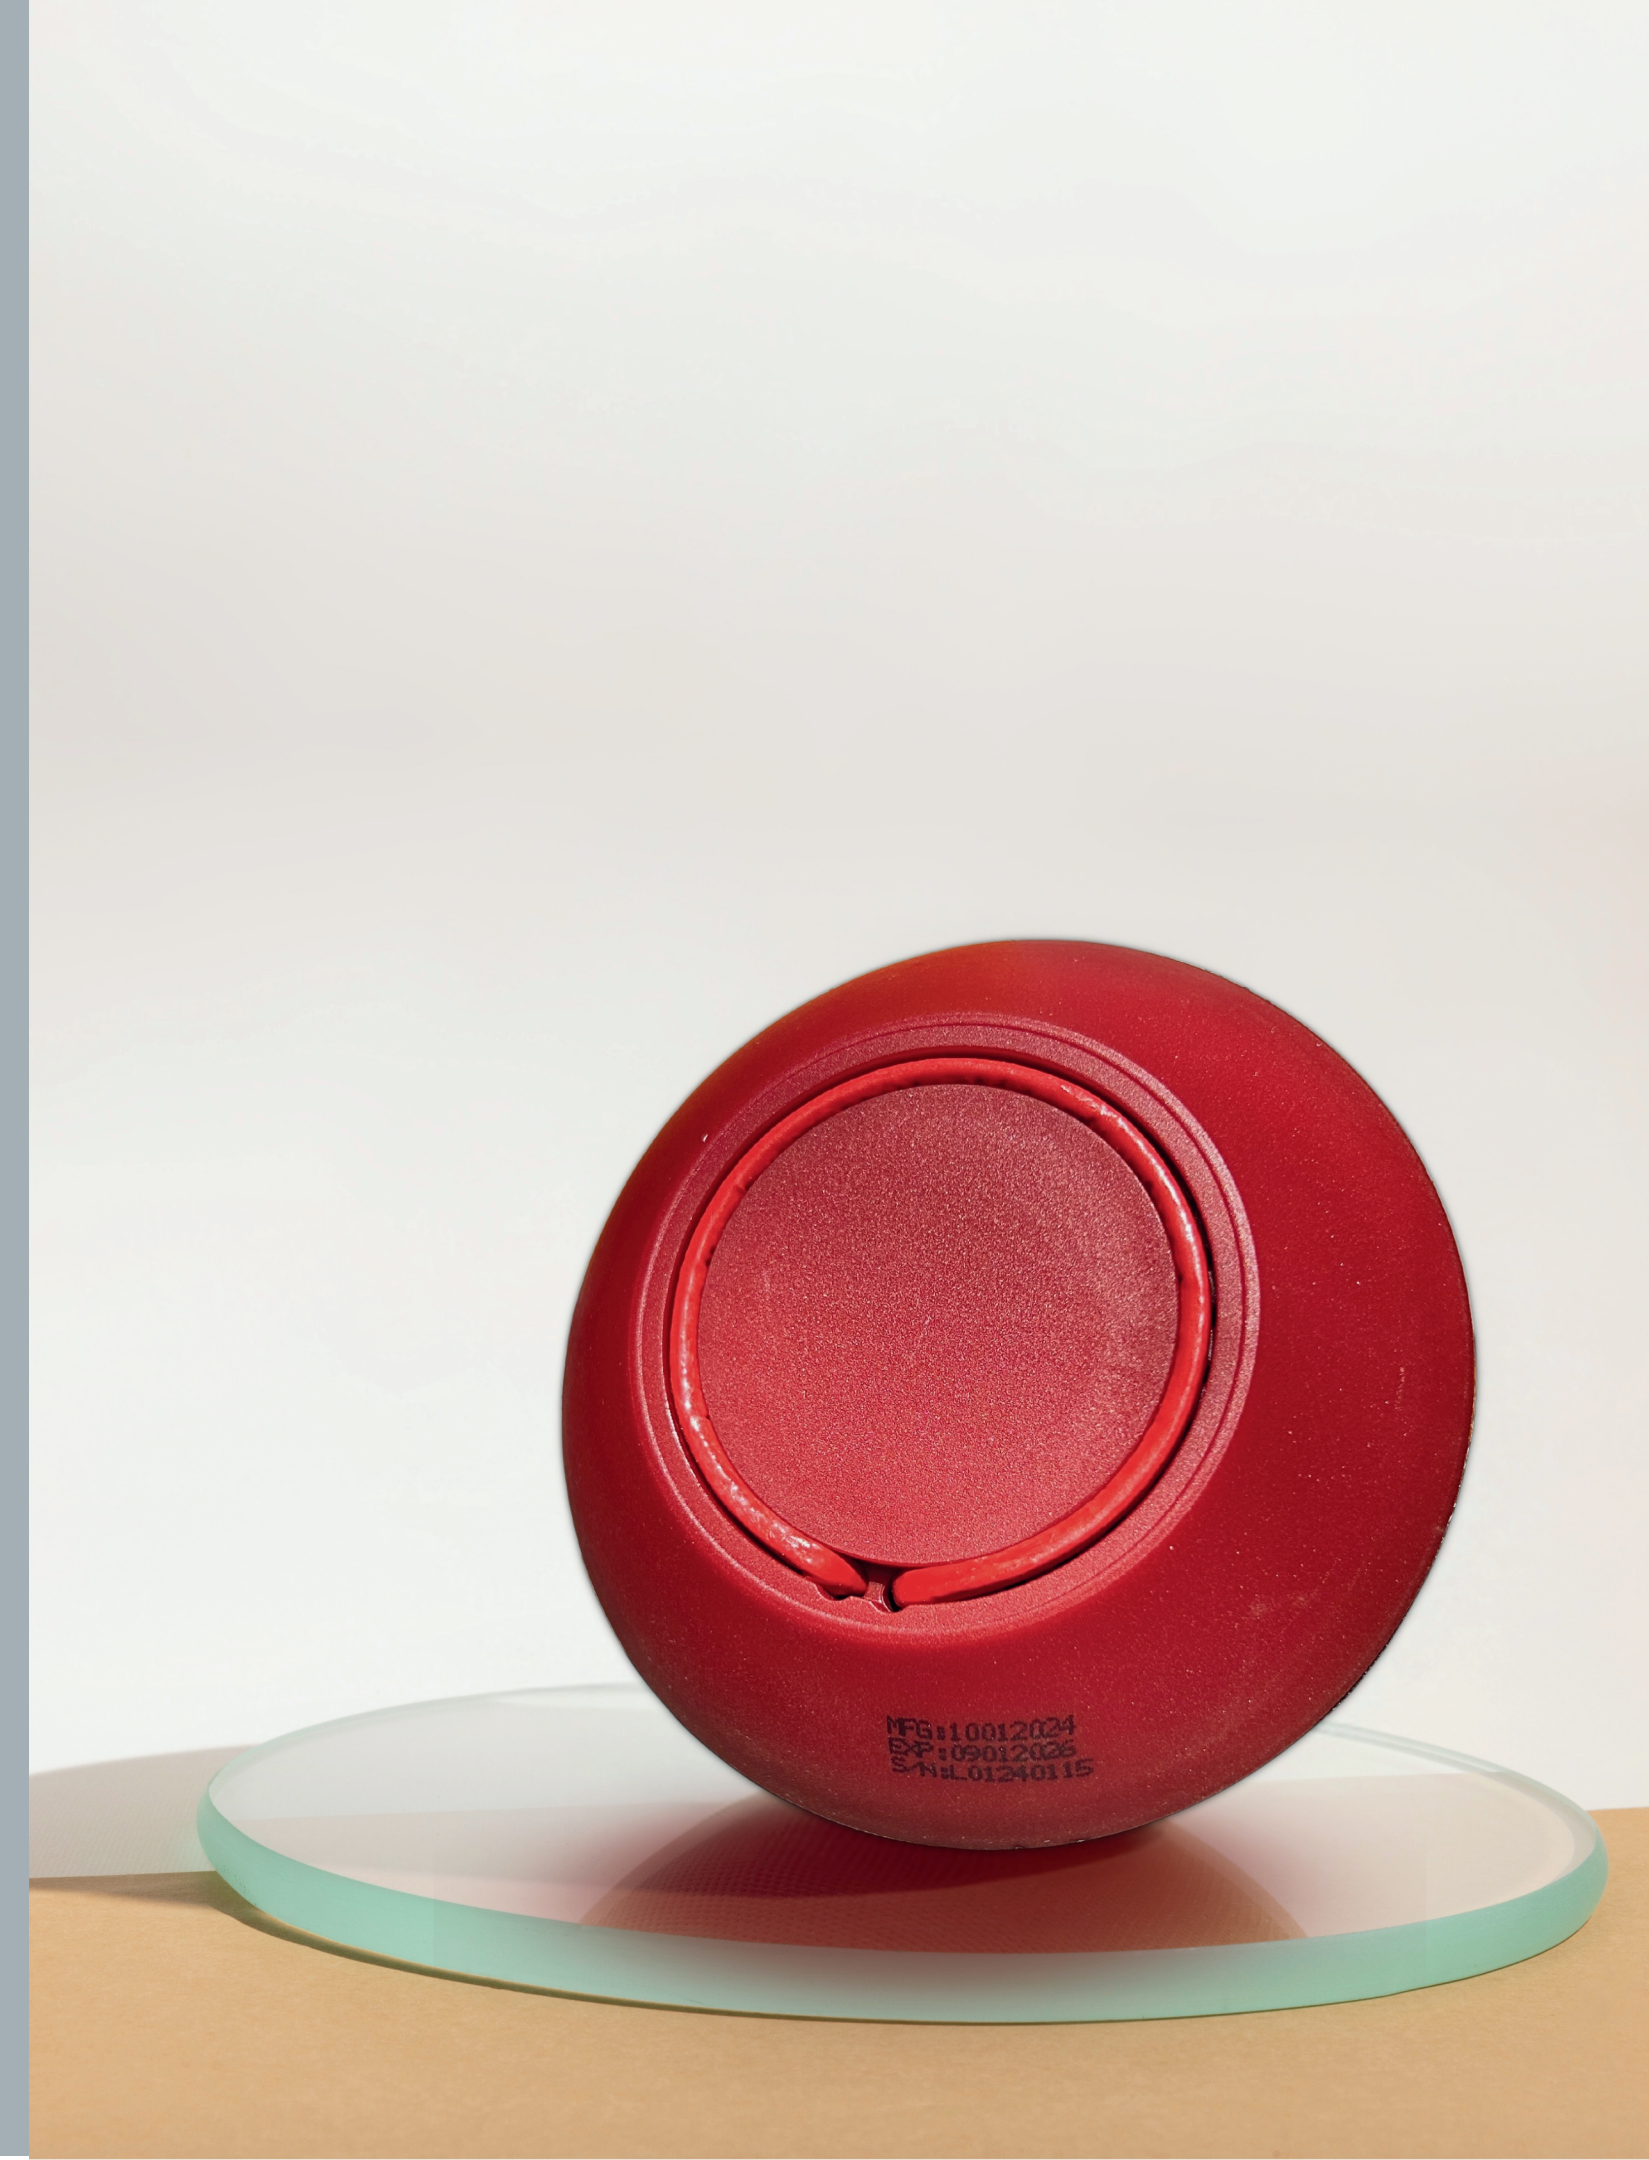

Stick Protect

We constantly invest significant resources in **research and development.**

Savio Stick Protect is the tangible result of this commitment.

This new product stands out for its exceptional effectiveness combined with ease of application and use, features that make Savio Stick Protect unique in the market. Designed for domestic, industrial, and nautical use, it serves as an aid in extinguishing fires caused by short circuits originating from unsupervised electrical distribution systems, such as meters, distribution cabinets, and open, closed, or ventilated electrical panels.

Showroom

A completely renovated and inspiring space. The **new Savio Group showroom** is designed to offer a unique experience where you can discover the latest innovations and solutions.

Savio quality

The certifications attest to compliance with specific standards of **quality**, **safety** and **environment**, both for the products and the company.

In its field, Savio was **among the first** to undertake the certification processes for **ISO 9001, ISO 14001, and ISO 45001 systems**.
